

# About US

SYS Electromac is the preferred OEM vendor for TPW fans to some of India's leading brands. SYS' factory is located in Hyderabad, India with a manufacturing capacity of over 100,000 units a month.

Keeping consistent with its goal to deliver value beyond its customer's expectations, the senior team at SYS consists of industry veterans with over 15 years of industry experience on average.

Our experience in the industry is well complemented by our superior infrastructure, with state-of-the-art machinery sourced from best in class providers in India and Taiwan.

At SYS Electromac, we value automation and product quality and have invested in plant and machinery to ensure the same. We currently own the following and continuously invest to keep upgrading our facilities.

- Automated Stator Winding sections
- Automated tooling and rotor machining
- Conveyorized assembly
- On-line quality testing for 100% of products
- R&D and Quality Audit facilities

SYS is currently working with leading brands including **Khaitan India Ltd, GM Electra, Finolex, Venus, REMI & MARC appliances** in addition to an ever-expanding list of customers.

# SYS Pedestal Fan Series

# Thunder Series

---

The thunder series is our flagship 18' all metal pedestal fan, that packs enough power to ventilate large spaces, ideal for covered patios or large rooms and halls. Aesthetically designed in an all-black body with chrome finish on its blades, guard & trim, the product adds elegance to its surroundings.

- Heavy duty winding for increased performance
- Specially designed metal blades for better air delivery
- Thermal overload protectors to protect against overheating
- Chrome finish on guard & blade adds to aesthetic appeal and prevents corrosion
- Metal base designed to provide stability

# Air Thrust Series

---

Our 16' metal pedestal fan with our Tri-Star blade is designed to provide more thrust, while adding a splash of colour to its surroundings. Designed for heavy duty performance, ably completed with elegant looks and colourful trims, the air-thrust series, truly brings together the best of both worlds.

- Hi-speed winding for increased performance
- Aerodynamically designed blades for increased thrust
- Thermal overload protectors to prevent from overheating
- Metal base for increased stability
- Available in multiple colours
